

JUST VERTICAL GROWERS GUIDE

SEEDLING KIT

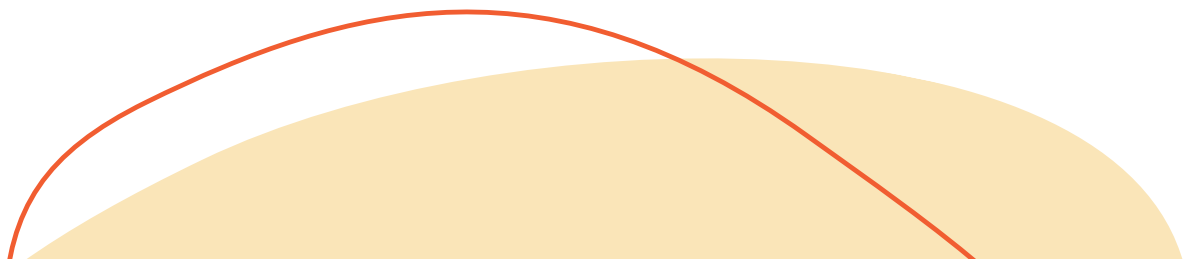

The Ultimate Growers Guide

Welcome to the food revolution! You are embarking on a journey towards a healthier and happier home. We are so glad that you could join us.

The important changes the world needs only happen because of people like you. This guide has everything you need to successfully grow with the seedling kit.

We are always available if you have any questions, or concerns.

Access live chat on the web at: www.justvertical.com

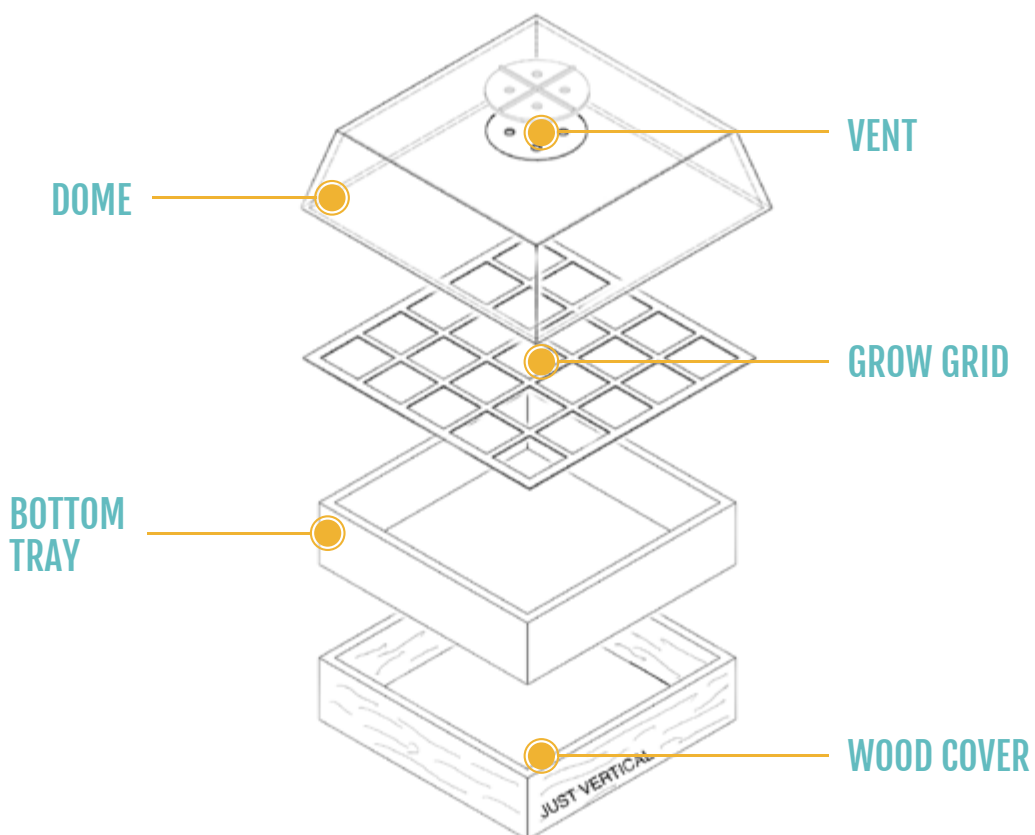

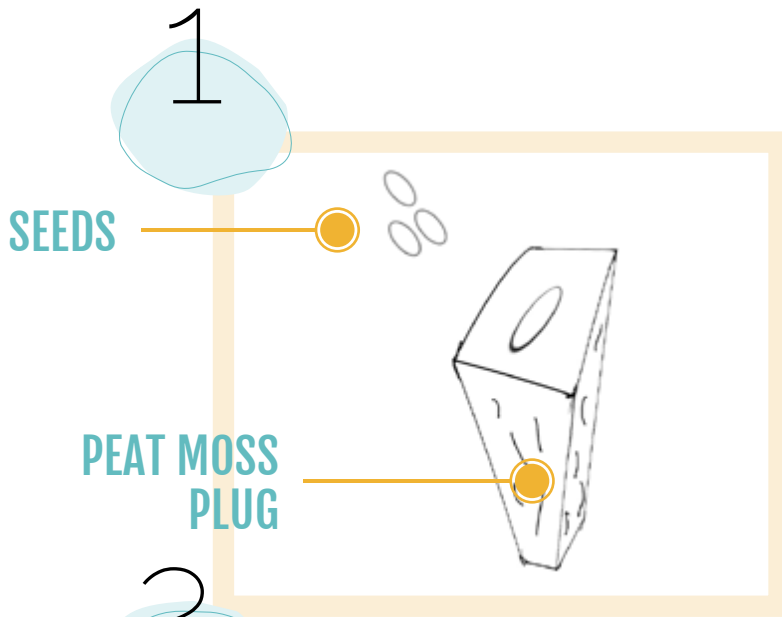

Using Your Just Vertical Seedling Kit

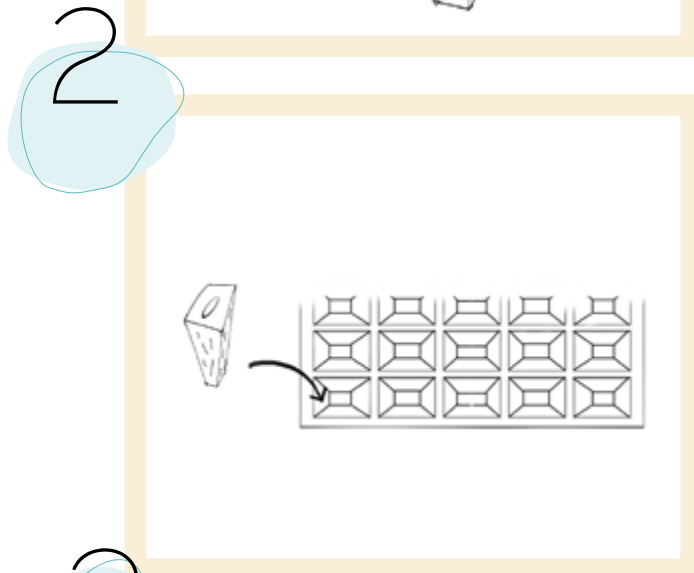

When you order seeds from Just Vertical you are getting the guarantee of seeds that we have tested ourselves. If any of our seeds don't germinate within 21 days we will replace them for free! Seeds are a living thing and sometimes they just don't germinate, so don't worry if a few don't come out right away!

You will use your seedling starter kit to start your seeds.

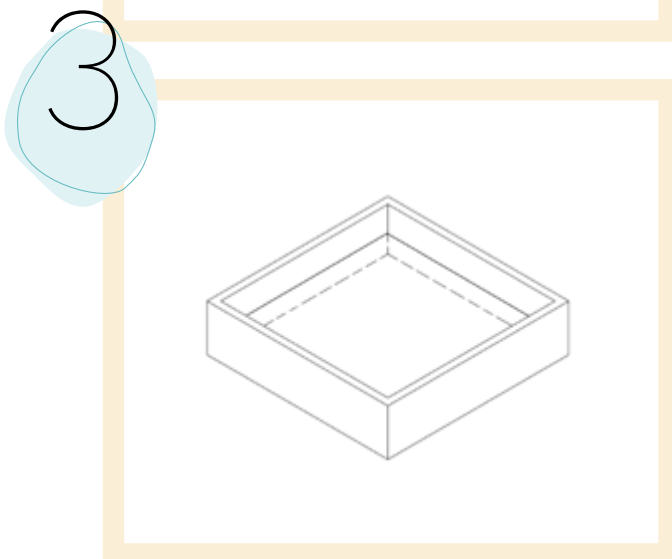

Plant 3-5 seeds per peat moss plug that you've received.

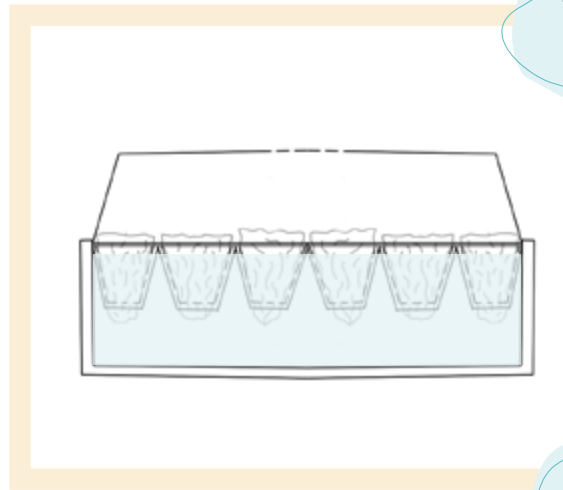

Place plugs with seeds into the black grow grid.

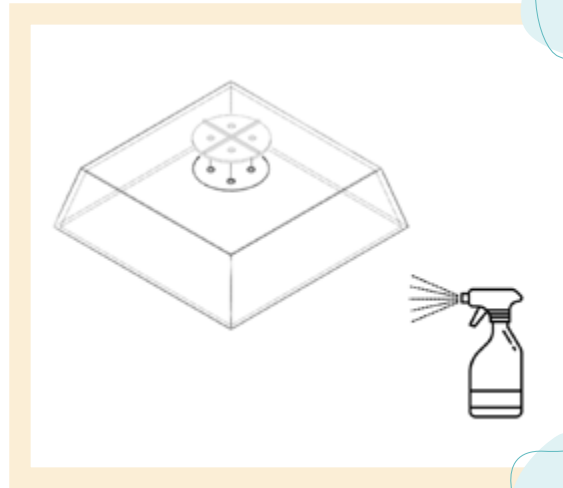

Fill bottom tray halfway with cold water.

Place the grow grid with the peat moss plugs into the water.

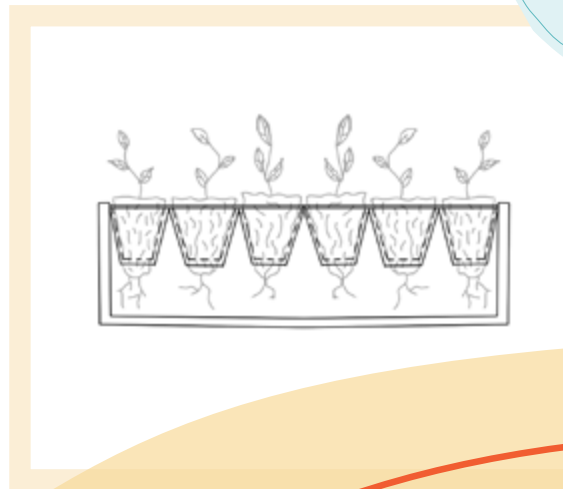

4

Spray dome with warm water and place on top. Keep vents open.

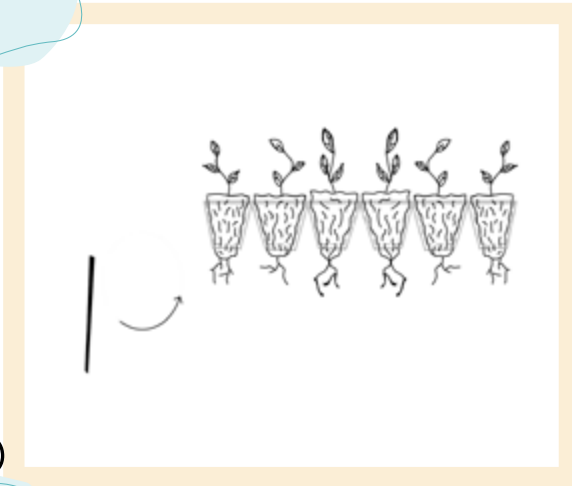

5

Once plants are touching the top of the dome, they are ready to be transplanted.

6

7

Push out seedlings from bottom opening in the grow grid.

8

Transplant seedlings into the pod in your Just Vertical AEVA or EVE, or transplant them directly into your garden outside.

THANK YOU!

WE'RE LOOKING FORWARD TO GROWING
WITH YOU
